# 2017 Combustible Dust Incident Report

# Report Summary

## Purpose:

The goal of this report is to increase awareness of combustible dust hazards and encourage adoption of prevention and protection practices.

## Recorded Incidents:

	Combustible Dust Incidents*			Related Incidents
	NORTH AMERICA	INTERNATIONAL	GLOBAL	GLOBAL
Fires	132	37	169	35
Explosions	32	36	68	41
Injuries	61	102	163	441
Fatalities	6	7	13	342

*\*An effort was made to identify incidents where industrial powder was not the main fuel and move these to "Related Incidents". When combustible dust could not be ruled out, the incident was left as a "Combustible Dust Incident" (CDI) and included in the analysis given herein.*

## Note on Methods:

This report was compiled using the News feature of Google search and keywords such as "Dust Explosion" and "Combustible Dust".

## Note on Completeness:

Due to reliance on third-party news agencies, incomplete articles, and Google search, the author makes no warranties or guarantees on the accuracy or completeness of information given in this document.

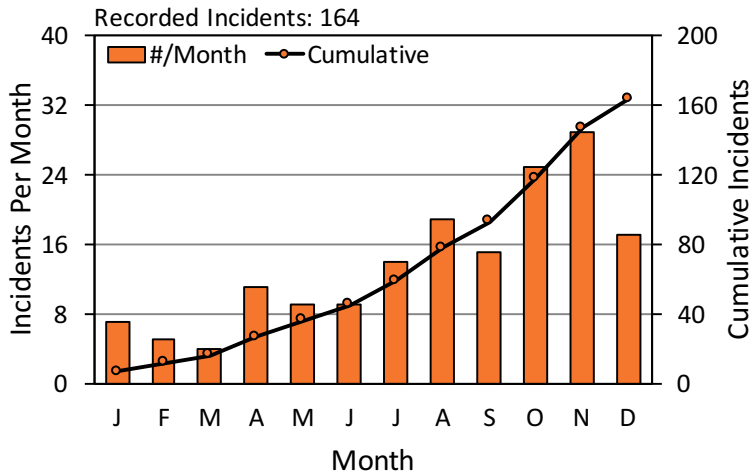

## Thank You to our Sponsors:

This incident reporting is made possible through the support of our paid sponsors. See a list of all sponsors on Page 17.

*"For a long time, people were saying that most accidents were due to human error and this is true in a sense but it's not very helpful. It's a bit like saying that falls are due to gravity"*

**- Dr. Trevor Kletz**

# North America Review

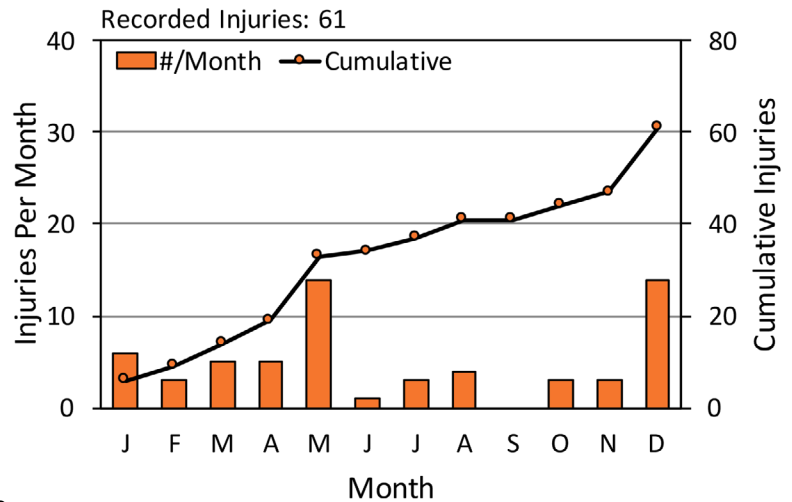

## Largest Offenders

Dust: **Grain Dust**  
 State: **Michigan**  
 Industry: **Wood Products**  
 Equipment: **Dust Collectors**

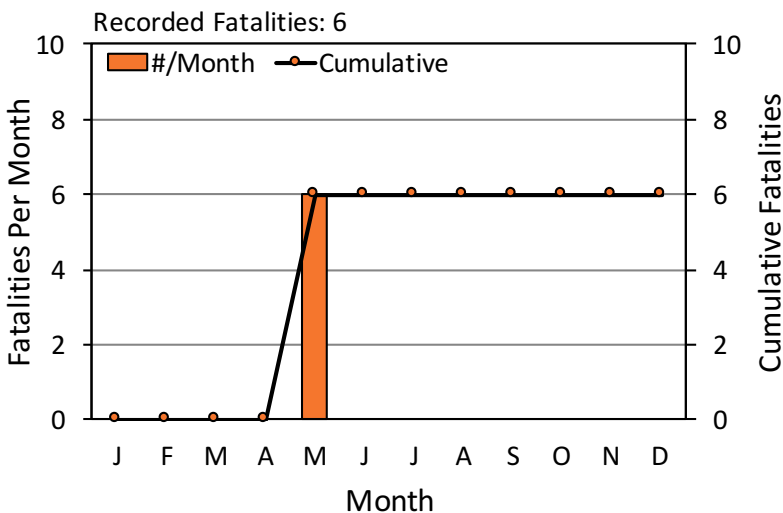

“The piece of equipment which was on fire was designed with ‘blow out’ panels which allowed a smaller explosion but reduce the chances of a catastrophic explosion.”

[CLICK TO VIEW ARTICLE](#)

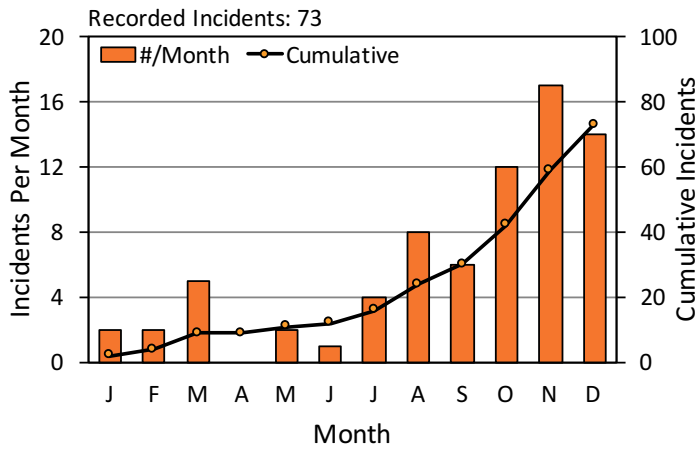

“The fire was so intense that most of the aluminum dust burned before it splashed onto the ground. Taylor says the near-molten metal burned a hole approximately 4 feet in diameter in the ground.”

[CLICK TO VIEW ARTICLE](#)

# International Review

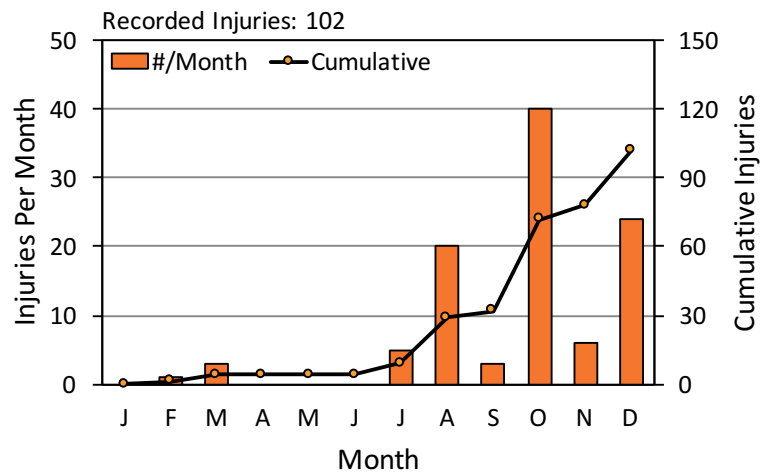

## Largest Offenders

Dust: **Wood/Grain Dust**  
 Country: **England**  
 Industry: **Food Processing**  
 Equipment: **Silos**

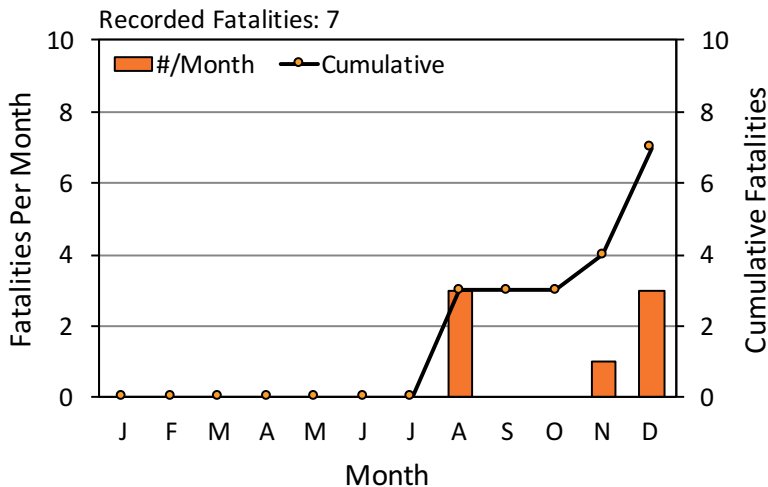

“They then climbed on the silo to spray water into it but a spark caused a combustion that lead to an explosion [...]. This is the fourth time the silo has caught fire in the past three months.”

[CLICK TO VIEW ARTICLE](#)

“A source confirmed that the girls were shooting a music video in the city of Namyangju when combustible dust got too close to the lightning, causing a small explosion.”

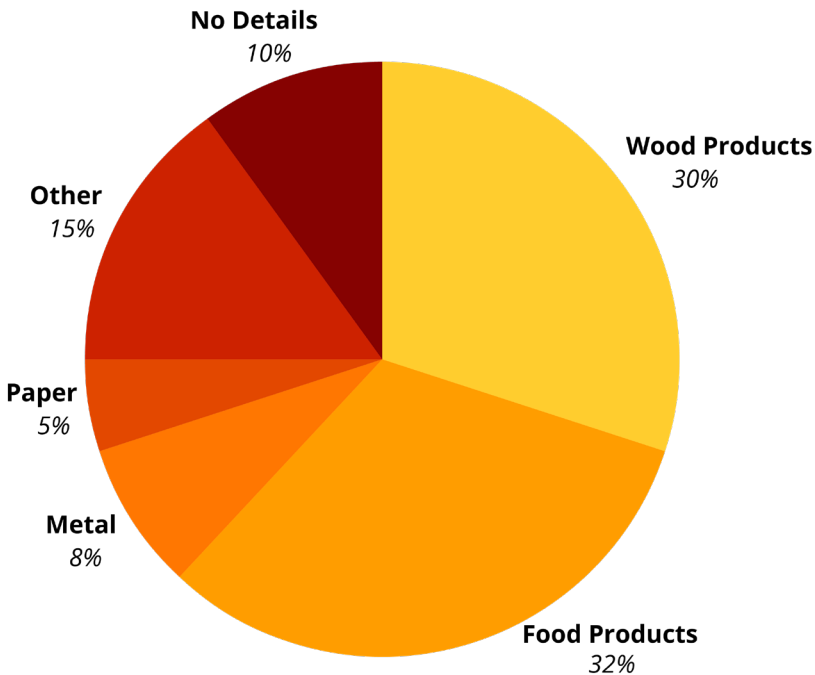

[CLICK TO VIEW ARTICLE](#)

# Materials & Industries

## Combustible Materials

“The findings indicate that an explosive atmosphere was created by a combination of off-gasses normally produced in the pulping process and air introduced to maintain pressure while the vessel was not in operation.”

[CLICK TO VIEW ARTICLE](#)

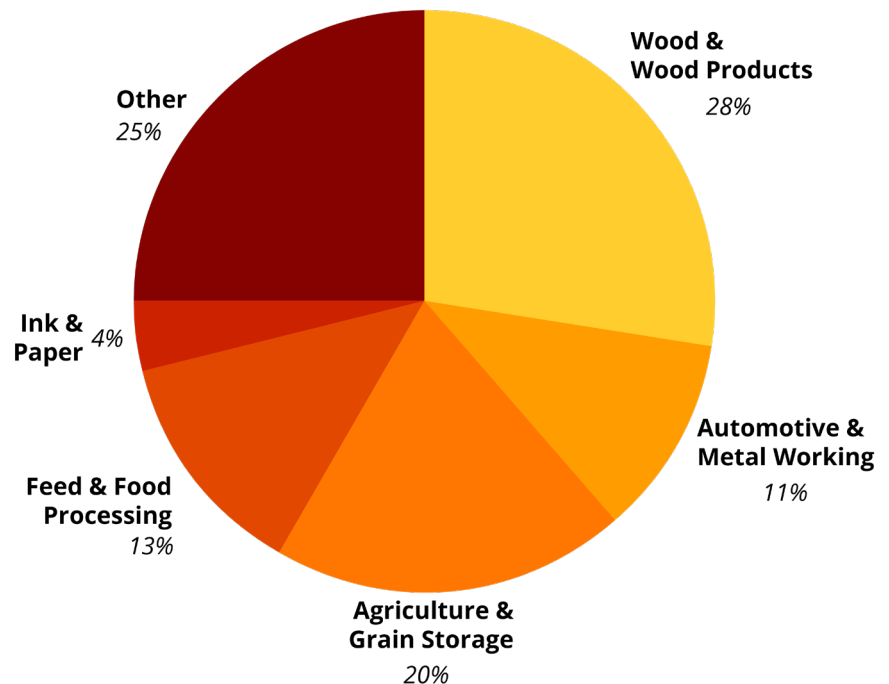

“The homeowner said she had used baby powder to smother ants on the second story. The powder came in contact with a space heater and ignited.”

[CLICK TO VIEW ARTICLE](#)

“Metal dust on the ceiling of the building caused the fire to spread, damaging some of the roof.”

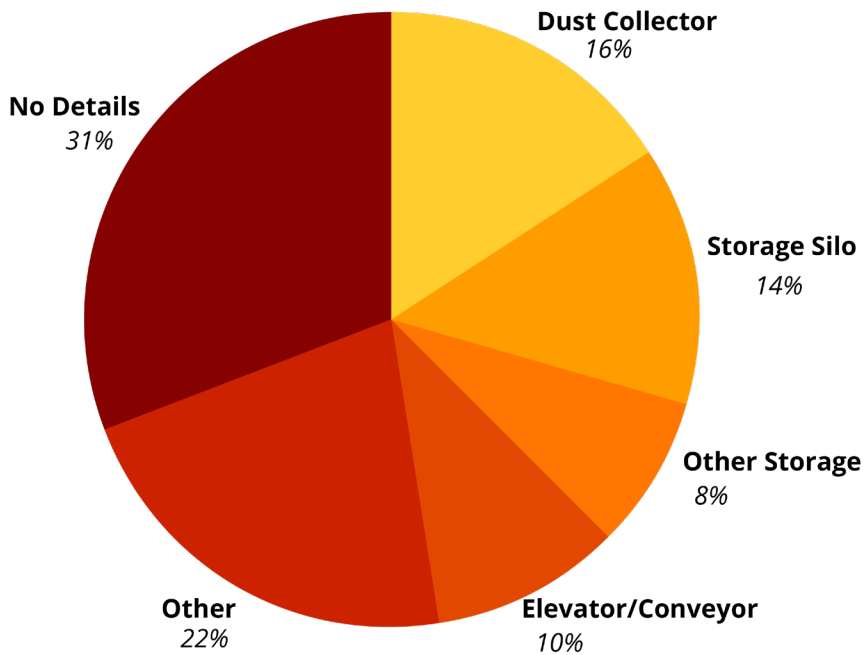

[CLICK TO VIEW ARTICLE](#)

## Processing Industries

# Equipment & Causes

## Equipment

“What it really came down to was mechanical failure on one of the components on the grain handling equipment”

[CLICK TO VIEW ARTICLE](#)

“A saw blade became dislodged from its spindle, causing sparks and pieces of hot metal to enter a dust collection system. Sawdust was then ignited in the equipment’s collection containers. Employees noticed the smoke and opened the container, causing a small dust explosion that injured the workers. The resulting fire completely destroyed the building,”

[CLICK TO VIEW ARTICLE](#)

“That process of moving a large amount of material through pipes creates static electricity, so that’s a problem they’re battling on a regular basis. I’m not saying that’s what occurred here, but that’s what we’re continuing to concentrate our investigation on”

[CLICK TO VIEW ARTICLE](#)

“Firefighting efforts were complicated by the large amount of sawdust inside the ductwork and equipment, which, according to one witness, is as flammable as gunpowder.”

[CLICK TO VIEW ARTICLE](#)

“The equipment is used to contain dust from the production of rubber products from the business, which is suctioned from the building into the machines. As the dust material is very fine, it tends to be highly combustible”

## FIRE AND EXPLOSION PROTECTION SOLUTIONS

**No Return Valves (Model #EM-NRV)**  
ATEX Certified EN 16447 & EN 15089

- ATEX Certified Explosion Isolation Valves (NRV)
- FM Approved Spark Detection & Extinguishing Systems
- High Speed Abort Gates/Dust Probe Monitoring
- Flameless Explosion Vents, ATEX Certified to 500 KST
- ATEX Certified Flat, Curved & HP Dome Explosion Vents
- Vessel Isolation & Suppression Systems
- EcoBOSS® Energy Saving Control Systems
- Engineering and Technical Support by Boss Products, LLC

- Ten Flameless Vent Sized from 7" X 19" to 44" Square
- ATEX Certified to 500 KST
- Choice of Flat Panel or High Pressure Dome Panel Vents

- Inspection Door for Maintenance Without Requiring Removal Of Flameless Vent Body from Vessel
- Burst Sensor Supplied With Flameless Vent Package

- Complete Selection Of All Common Flat Panel And High Pressure Dome Style Explosion Vents
- All Products In Stock At Traditional Quantity Pricing For Smaller Orders

## COMBUSTIBLE DUST TESTING SERVICES

Comprehensive. Responsive. State-of-the-Art.

**JENSEN HUGHES**

Advancing the Science of Safety

Our state-of-the-art dust and flammability testing laboratory offers the complete suite of testing services to characterize material hazards.

Contact us today to discuss your testing needs.
